2022 State of the Industry Report:  
ARTIFICIAL INTELLIGENCE  
August, 2022

CITY  SNICKER  
Corporate. Served dry.

# Purpose of the Study

Business leaders like to click lots of computers these days. And sometimes those leaders like to let computers click themselves - a practice known as artificial intelligence, or AI. The purpose of this global survey was to explore what business leaders across a variety of industries were letting their computers click, as well as learn how leaders are managing the risks of AI, since the risks aren't as artificial as the intelligence.

The research questions that were explored included the following:

1. Which industries use AI the most?
2. How are business leaders using AI?
3. How do leaders manage the risks of AI?

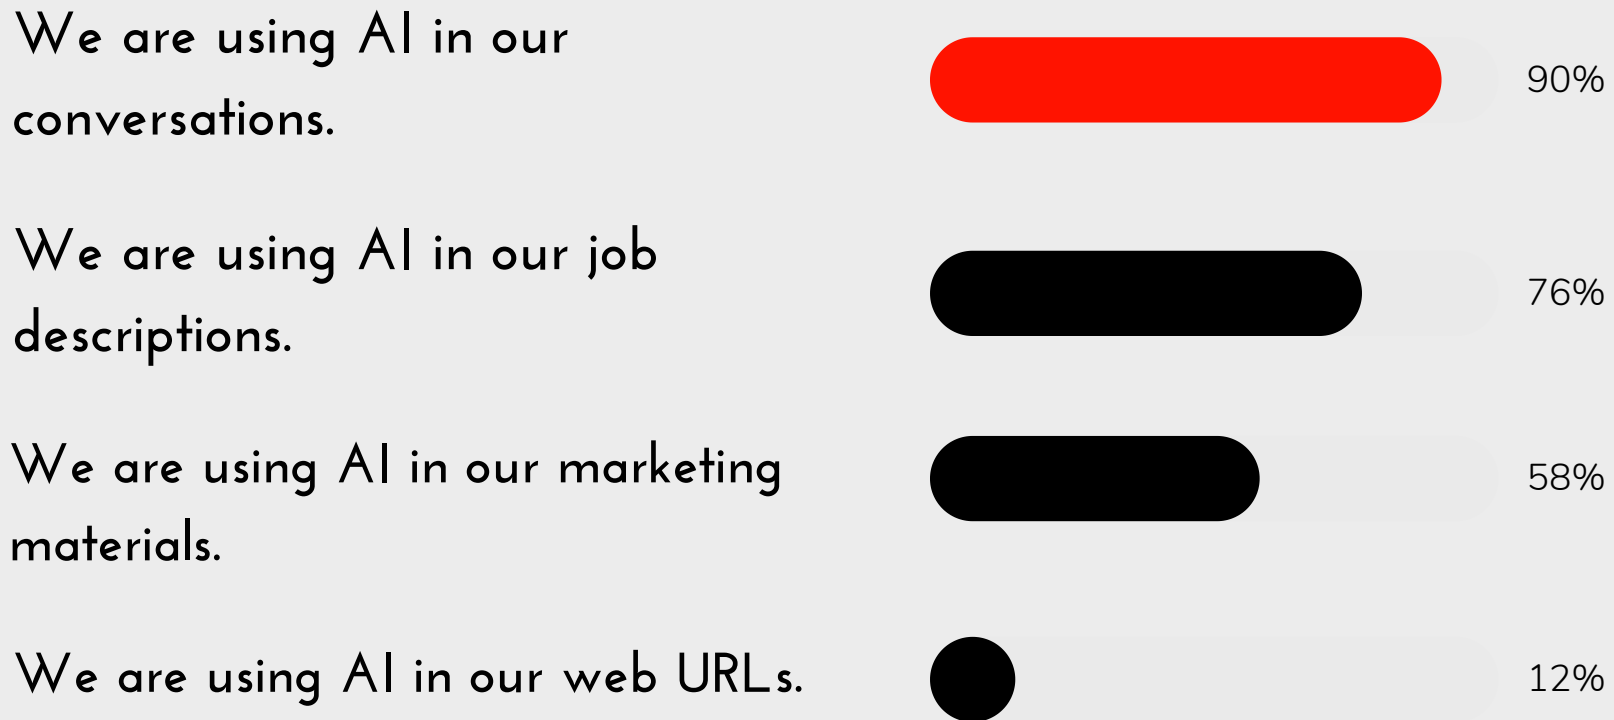

Business leaders from a total of  $n = 1,345$  companies worldwide participated in the survey.

# RESULTS

## Which industries use artificial intelligence the most?

# How do business leaders from industries (other than AI startups) report using artificial intelligence?

Percent of respondents

## How do business leaders from AI startups report using artificial intelligence?

Percent of respondents

## How do leaders report managing the risks of artificial intelligence?

Very carefully.

We are shopping for a vendor who specializes in AI risks.

"Hmmm. I don't have an answer for that. Is there something else I can help you with at the moment?"

No need to manage risks. Computers nice for play computer.

Percent of respondents

# Conclusions

Business leaders interested in AI are encouraged to look at these graphs.

And if you register your domain name with .ai, you can artificial intelligence.
